

RD5 Roof Deck Panels

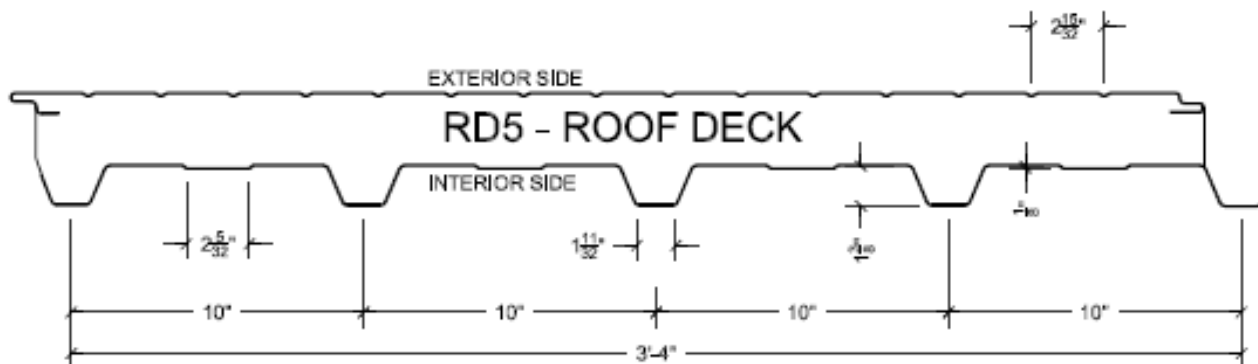

All Weather RD5 roof deck panels are an ideal solution to labor intensive field assembled roof deck systems eliminating 2 steps and at least one trade due to the composite design.

Because the RD5 panel is produced on a state of the art continuous production line, reliance on field workmanship is minimized. The 40" wide panel installs quickly and economically.

FEATURES AND BENEFITS

- The composite nature of the RD5 panel provides far superior span characteristics compared with single sheet metal roof deck profiles
- The standard metal surface is 26 to 22 ga G-90 galv steel that acts as a flat substrate for fully adhered or mechanically attached single ply roof membranes. It is also a perfect substrate for standing seam roofs.
- The panel arrives on site in one piece and requires a simple one step installation reducing construction time and costs.

PRODUCT PARAMETERS

Panel Thickness:	2.5"	4"	5"	6"
Insulating Values (R):	21	33	42	50
Panel Width:	40"			
Panel Length:	from 8' to 62' maximum			
Insulation Material:	CFC-free foamed-in-place isocyanurate foam 2.2 to 2.5 pcf density			
Joint Configuration:	overlapping			
Metal facings:	26 ga galvanized steel (22, 24 ga available)			
Coatings:	polyester, ceramic, PVDF			
Accessories:	fasteners, sealants, brake formed flashings			

ALL WEATHER INSULATED PANELS
